

SEGLAND LIMITED

Civil • Mechanical • Electrical Engineering

Engineering solutions built for Kenya's future.

Segland Limited is a Kenyan engineering company based in Upperhill, Nairobi. The company was incorporated in June 2015 and provides civil, mechanical and electrical engineering works.

Our Core Services

Civil Engineering	Infrastructure, construction and site-related engineering works.
Mechanical Engineering	Mechanical installations, equipment and maintenance-related works.
Electrical Engineering	Electrical installations, power systems and maintenance-related works.

Experience

Segland Limited has worked with organisations including Kenya Power and the Kenya National Highways Authority (KeNHA), reflecting experience within Kenya's energy and infrastructure environment.

Our Approach

We focus on practical engineering solutions, disciplined execution and clear communication, bringing civil, mechanical and electrical capability together around project requirements.
